

→ ALUMINIUM WINDOW SILLS

SOFT LINE and CLASSIC

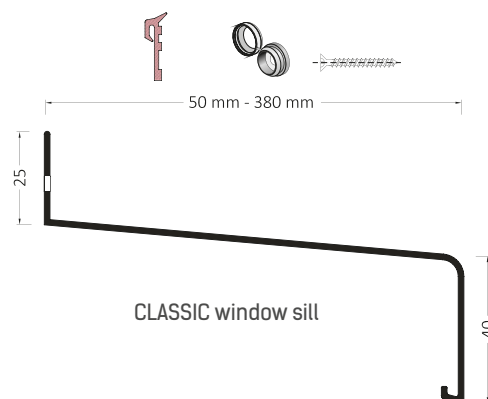

Soft Line and Classic aluminium sills and systems for wooden windows are produced by means of extruding high quality aluminium alloy, thus creating products of perfect durability, tightness and solid build. Soft Line and Classic sills receive a full set of complementary accessories: with caps, gaskets, stainless steel screws equipped with tight clips and drip profiles with end caps. Window sills available in anodised and powder coated versions.

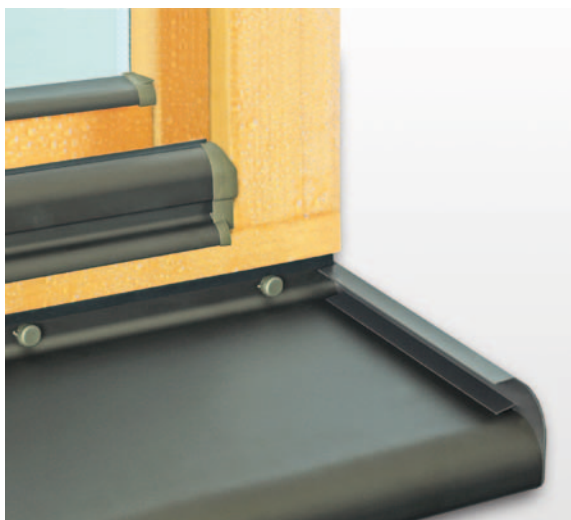

CLASSIC

THE CLASSIC SILL SYSTEM STANDS OUT WITH:

- Angular shape of profiles
- Varied width of window sills: 50 to 380 mm
- Extruded profiles of high rigidity
- A broad range of accessories, including sill support for thermo type facades

→ SYSTEMS FOR WOODEN WINDOWS

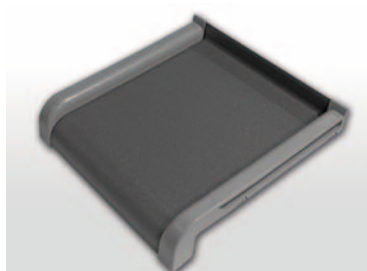

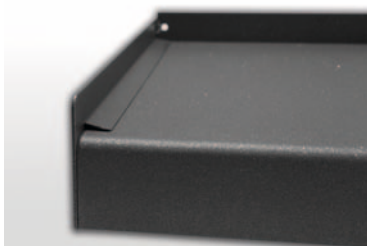

SOFT LINE and CLASSIC

Aluron's product range includes complete systems for wooden windows such as: drip profiles, glazing beads and aluminium thresholds. This system also includes a wide array of accessories such as system end caps, both straight and sloping, for many different window frames; assembly clips for drip profiles and glazing beads, gaskets, profiles for sub-threshold assembly adapters, connectors, screws and more. All those elements stand out due to their meticulous approach to execution. They are made of high quality materials, providing protection against UV radiation.

DRIP PROFILES

Gutter drip profiles are available with a thermal insert or fully aluminium in the Soft Line and Classic style.

This range includes models for all of the most popular window millings as well as balconies and the Style-type structures.

GLAZING BEADS effectively protect the most vulnerable parts of the sash against UV rays. Visually adjusted to the Soft Line and Classic drip profile line, glazing beads are mounted by means of system clips or sticks.

DOOR THRESHOLD

The offer includes door thresholds with thermal insert or fully aluminium, fitted with gaskets that increase the tightness of door constructions. In addition, the offer also includes a wide range of assembly accessories.
