

# GEMINI *for* GEALAN S 9000

PVC-aluminium system

Aluminium cladding system for GEALAN S 9000 system windows

## PVC-ALU INSTALLATION

Aluminium frames constitute a separate structure in relation to PVC windows. They are mounted by means of system clips in the final stage of assembly after the glazing is set. This ensures separation between the two different materials and, as a result, the proper and safe operation of windows in changeable temperature conditions.

## SYSTEM FEATURES

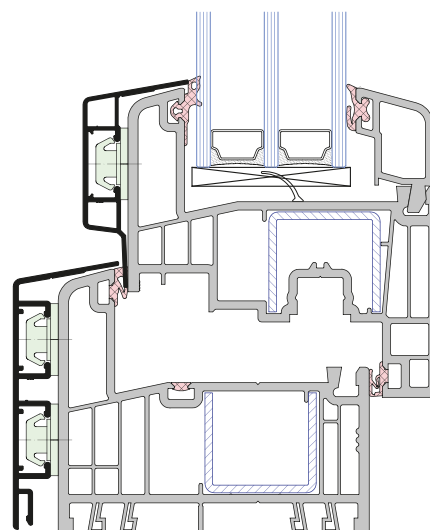

Welded corner connections

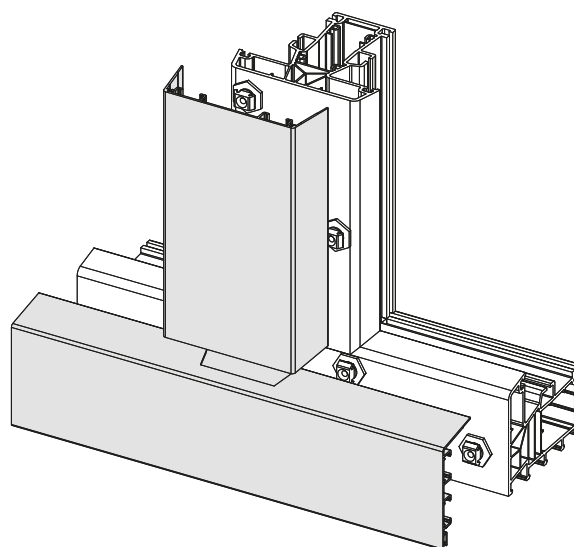

Crimped corner connections

Assembly with system clips

## PVC - ALU - COLOUR SCHEME
