

# AF 50R

roof windows and glazed roof (skylights)

AF 50R is a modern window System, designed for mounting on roofs in AF 50 or AF 50S System. Beside illuminating the room, it provide sufficient ventilation and airing. It is an aesthetic roof window doubling down as a ventilation flap with very good sealing, thanks to our original overlay glazing system.

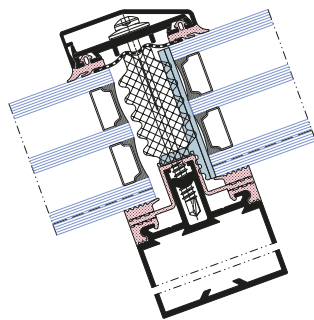

## ROOF WINDOWS AF 50R

AF 50R are solutions for roof window, based on facade system of AF 50 and AF 50S, that match constantly increasing requirements for roof designs - both in terms of utility and thermal insulation; room illumination and ventilation being the primary ones. The triple-chamber body allows for implementation of thermal inserts which, in turn, grants excellent thermal insulation. Sealing is ensured thanks to the use of our original overlay glazing system and implementation of central gasket.

### SELECTED FEATURES AND SYSTEM PARAMETERS

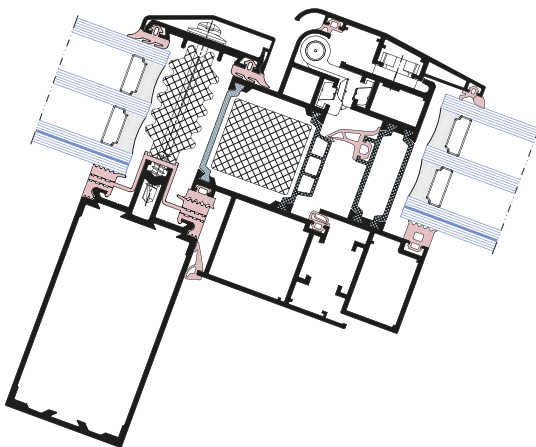

Glazing range	up to 58 mm
Window weight	200 kg
The minimum inclination angle	2-75°
Window thermal insulation Uw	from 0,84 W/m <sup>2</sup> K
Air permeability	4 class
Waterproof	E2400
Wind load resistance	C5/B5

Glazed roof (skylights) and roofs

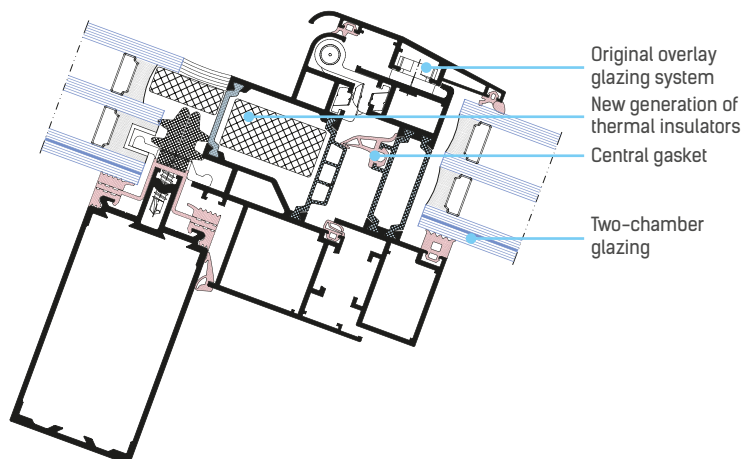

### THE SYSTEM AF 50R STANDS OUT BY:

- Original overlay glazing system ensuring above average tightness
- Easy and efficient installation - a user-friendly system
- Can be used both in the AF 50 facade and the AF 50S version
- Two-chamber glass as standard
- Effective drainage and ventilation system, drainage of condensation
- The possibility of using insulating inserts in the profile chambers
- Opening by hand or by using electric actuators
