ALUMINIUM WINDOW SILLS

Classic and Soft Line

 **aluron**
ALUMINIUM SYSTEMS

CLASSIC & SOFT LINE

Aluminium window sills

The comprehensive Classic and Soft Line systems are dedicated to timber, aluminium, PVC and windows with aluminium covers. They are manufactured using the aluminium extrusion method from constructional alloys that meet the highest quality standards. The products are distinguished by: high rigidity, excellent durability, tightness and solid workmanship.

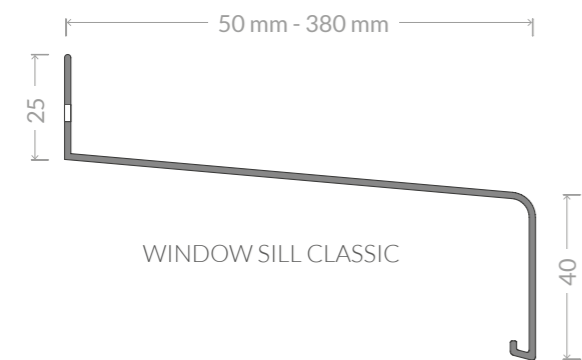

The system is completed by a wide range of accessories including: end caps, gaskets, stainless steel screws, screw cover clips.

Aluron window sills are available in three surface finishes: anodised, powder-coated and imitation wood texture.

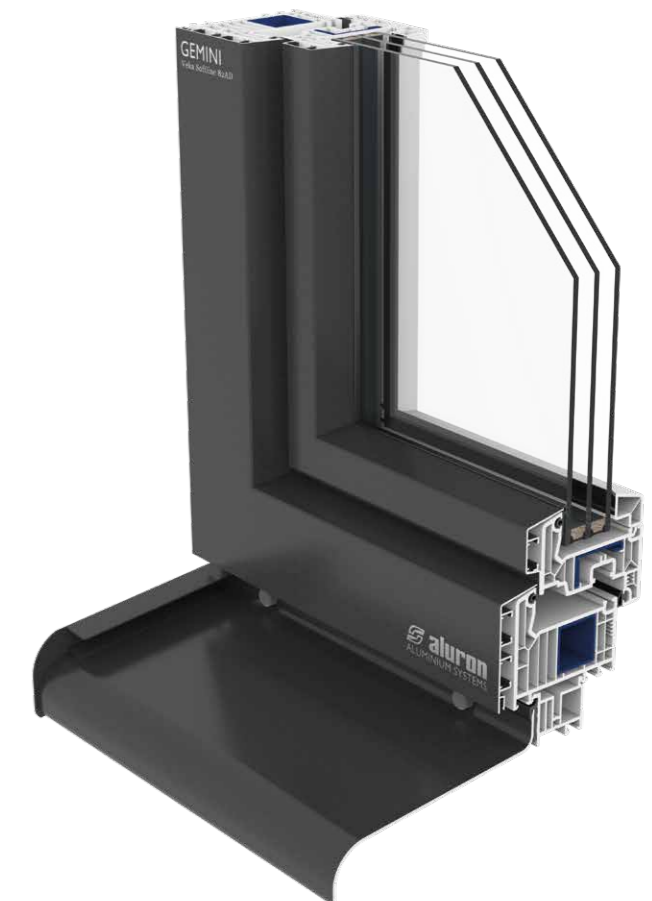

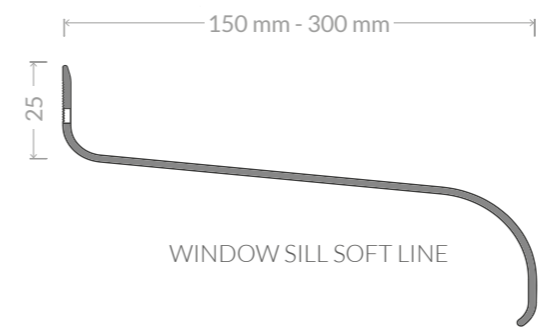

CHARACTERISTICS OF CLASSIC WINDOW SILLS

-  Angular shape of the aluminium profiles
-  Average sill thickness of approx. 2 mm
-  Variable sill widths from 50 to 380 mm
-  Extruded aluminium for indoor acoustic comfort
-  Possibility to weld sills at different angles

CHARACTERISTICS OF SOFT LINE WINDOW SILLS

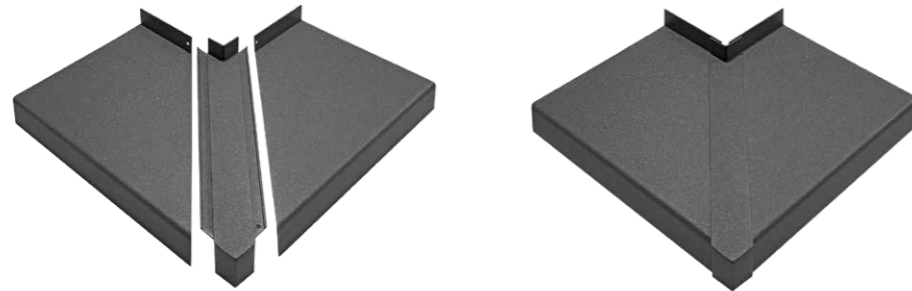

-  Rounded shape of the aluminium profiles
-  Average sill thickness of approx. 2 mm
-  Variable sill widths from 150 to 300 mm
-  Extruded aluminium for indoor acoustic comfort
-  Possibility to weld sills at different angles

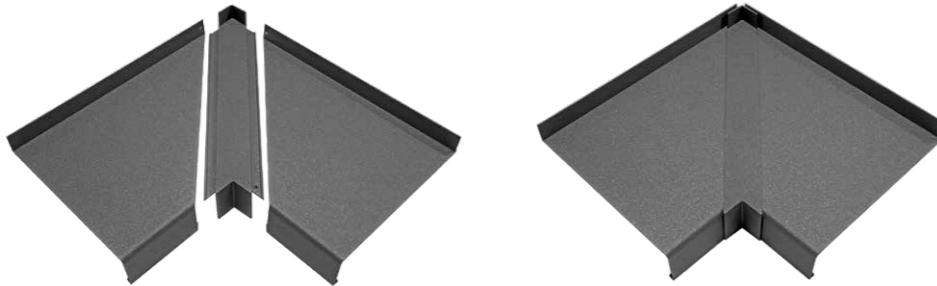

ACCESSORIES FOR CLASSIC WINDOW SILLS

Connectors:

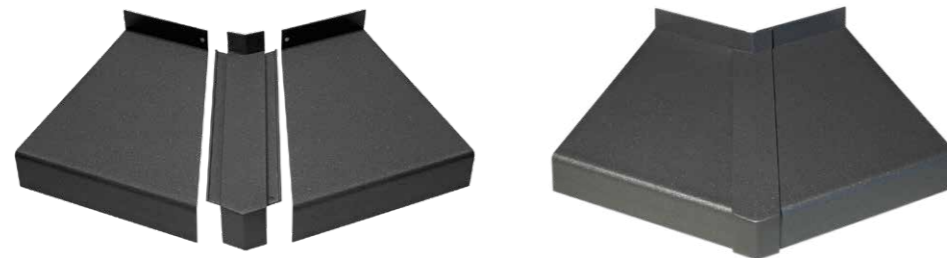

External corner connector 90°
(LAK40/XXX/Z/90S)

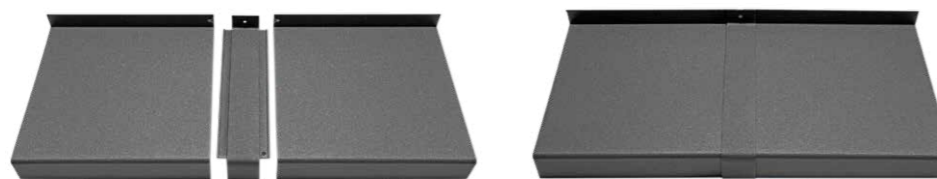

Internal corner connector 90°
(LAK40/XXX/W/90S)

External corner connector 135°
(LAK40/XXX/Z/135S)

Straight connector 180°
(LAK40/XXX)

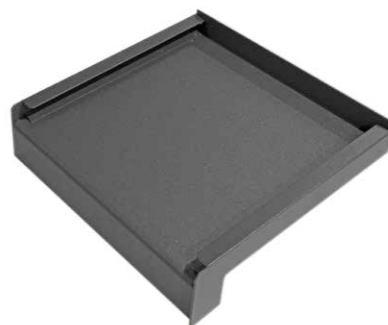

Support brackets: End caps:

Window sill support bracket
(WAK40/150 - 225)

Plaster end cap
(ZAK40/XXX)

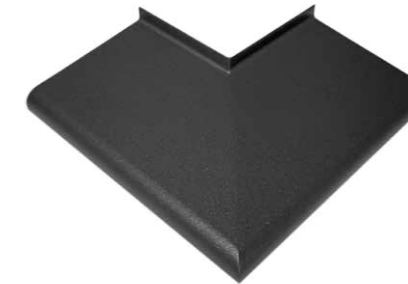

Clinker wall end cap
(ZAKF40/XXX)

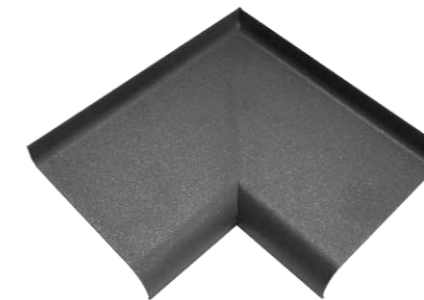

ACCESSORIES FOR SOFT LINE WINDOW SILLS

Connectors:

External corner connector 90°
(LAS/XXX/Z/90S)

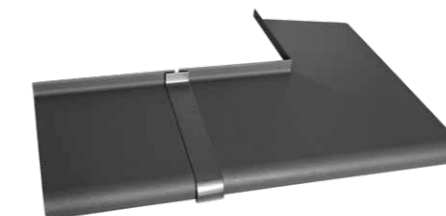

Internal corner connector 90°
(LAS/XXX/W/90S)

External corner connector 135°
(LAS/XXX/Z/135S)

Straight connector 180°
(LAS/XXX)

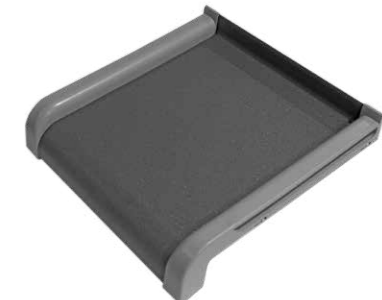

End caps:

End cap for plaster
(ZA/XXX)

Plastic end cap
(ZT/XXX)

Clinker wall cap
(ZAKF/XXX)

WINDOW SILL GASKET

A gasket is suitable for Classic and Soft Line window sills. Its use eliminates the need to apply other types of sealants such as silicone, which is an impermanent solution. Over time, the sealant crumbles, which decreases the tightness of the entire construction. What's more, incorrect application of silicone reduces the aesthetic value of the facade.

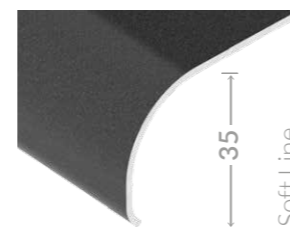

WINDOW SILL SUPPORT BRACKETS

Aluron offers aluminium support brackets dedicated to Classic window sills which provide support for the window sill in the case of a thermo facade. Their use facilitates the installation of the window sills in the thermal insulation layer and increases the rigidity of the structure.

EAVES PART OF THE WINDOW SILL

In the Aluron window sills, the eaves part is longer than in most standard products from other manufacturers. In the case of the Classic variant, it is 40 mm and in the Soft Line version it is 35 mm. The longer eaves part has a positive effect on the efficiency of rainwater drainage, increases the aesthetics of the facade and the functionality of the structure (connectors, mats, brackets, etc.).
