

## Aluminium facade board **Verticover**

**Verticover aluminium facade boards are an extremely elegant and modern way to finish the facades of both private houses and public utility buildings.**

They are characterized by extraordinary durability and resistance to mechanical damage. The facade board can be laid vertically, horizontally or at any angle, which makes it an interesting architectural element that gives a unique character to each investment.

A rich palette of RAL colours and wood decors allows of easily matching the colour of the facade boards to the joinery, house facade and other equipment elements such as: entrance doors, blinds, roller blinds, mosquito nets, balustrades or fences.

The system is complemented by accessories including: corner profiles, connectors, catches and screws.

### CHARAKTERYSTYKA SYSTEMU

6000 mm	135 mm	8 mm	7 pcs.
Board length	Board width	Board thickness	Number of boards per 1 m.

# DESIGN & FUNCTIONALITY
